# The Best Thesis in Neuroscience 2023 Award

Martino Avallone

Precision mapping of gene expression and proteins in the brain using gene editing and barcoded viral vectors

Join us for the presentation, award ceremony and snacks
May 30th at 16.00 in Segerfalksalen

" The thesis of Martino Avallone was selected based on its deep investigation of new approaches for (PD) disease modeling in vivo using advanced theory and methods. [...] this thesis provides detailed insight into how molecular changes are ordered in neuronal degeneration and contributes to the development of more sophisticated experimental models to predict and counteract the disease course. "
